“As an author and speaker and someone who is often called “The Queen of Networking” I have no hesitation in saying that after reading Murali Murthy’s 15 success principles to Absorb, Comprehend and Excel in every area of life, it is definitely a book I would recommend.

This is a book that shares quotes, stories and insight. It’s an easy read and one that you can pick up whenever you need a little help getting you where you want to go. Each chapter is identified with a way to “Be”. The reader can choose where they want to “be”. Is it Focused; Proactive; Happy? It’s up to the reader to decide. It’s a brilliant way to keep the book moving, with quick and easy to read chapters and always with an interesting and relevant story.

Murali did his research, he identified his market and he has captured his readers’ attention.

I particularly liked his definition of a true Mentor. “One who is often an unreasonable friend, someone who will challenge you and keep you on track.” He is definitely on the right track and his words will challenge you to succeed!”
